

Biarca Patrol is a comprehensive security and compliance solution deployed on the enterprise Google Cloud Platform (GCP) project infrastructure assets. Biarca Patrol addresses the following challenges of Enterprise Infosec and IT groups:

- Managing the visibility and configuration of cloud assets
- Monitoring the compliance creep
- Remediating security misconfigurations

Biarca Patrol brings business value to each challenge addressed:

- Improved visibility, centralized cloud assets, and reduced blind spots
- Active detection of misconfigurations and reduced remediation time
- Enhanced security posture and governance
- Customized rules for cloud security and compliance

Figure 1: Biarca Patrol at a Glance

Biarca Patrol Use Case Examples

POLICY-BASED MONITORING & CONTROL

- Choose compliance policy selection or manually set security and compliance policies
- Intuitive dashboards for security and compliance
- Maintained historical change log of assets and user activity

REAL TIME DETECTION & REMEDIATION

- Supports continuous detection of changes and reports on the cause of events in the cloud
- Continuous monitoring to ensure adherence to policies and alerts when violations occur

INVENTORY OF ALL RESOURCES

- Obtains complete visibility of cloud resources
- Enables detailed reporting of risk assessment processes
- Identifies violations and facilitates response

COMPLIANCE ENFORCEMENT

- Enforces compliance to industry standards and regulations such as HIPAA.
- Identifies policy violations as they occur and deploys user/policy defined actions to restore compliance

Biarca Patrol Architecture Features

- Rapid deployment
- Built for scale
- Microservices native
- Security & compliance driven
- Robust messaging
- Scheduled and on-demand scans
- Compliance enforcement - event based triggers

Biarca Patrol User Experience

- Comprehensive Dashboards
- Real Time Updates
- Scan History
- Server Configuration
- Compliance Summary
- Managed Projects
