

Digital business transformation is changing the way businesses around the globe work, engage, and interact with employees and customers. This transformation is impacting technology. New applications, built on new cloud infrastructures, are the new norm. These new environments, like their predecessors, require security and compliance validation to protect the confidentiality, integrity and availability of data.

SECURE DIGITAL TRANSFORMATION

A New Normal

- Covid 19 has accelerated the digital transformation which increased cloud adoption and need for cloud security
- As per Gartner, multi-year investment in cloud technologies continues in 2020 with a 6.3% growth in Enterprise public Cloud in 2020 touching \$258B
- Google Cloud is rapidly becoming an enterprise cloud favorite with its superior technology offering at ~\$12B

Is Public Cloud Secure?

- 50+% of CISOs feel public cloud security needs to be strengthened
- Leading issues: misconfigurations, user permissions, lack of real-time remediation
- 60% of CISOs plan to procure a security solution and have increased their budget allocation to more than 10% of the overall cloud spend

ArcaWorx

- Purpose built for Google Cloud Platform (GCP)
- CSPM (Cloud Security Posture Management) with XDR (Extended Detection and Response) capabilities
- Suite of Products: ArcaScout (Capture, Assess, and Report) and ArcaKnight (Enforce)

Advantage

- Centralized dashboard with improved visibility for cloud assets and reduced blind spots
- Active detection of misconfigurations and reduced remediation time
- Enhanced security posture and customized rules for cloud security and compliance

Our Customers and Team

- Active production deployment in healthcare, education, manufacturing and wellness
- Cloud Native evangelists Dr. Kris Rajana (CTO) and Bhasker Nallapothula (Engineering)
- Subha Rajana, our CEO experience in Strategy, Marketing and Management

Customer Value

Instant visibility of cloud asset health status

- Compliance Status and Vulnerability Status
- Dashboard view of all project assets

Active validation of cloud project security and compliance

NIST

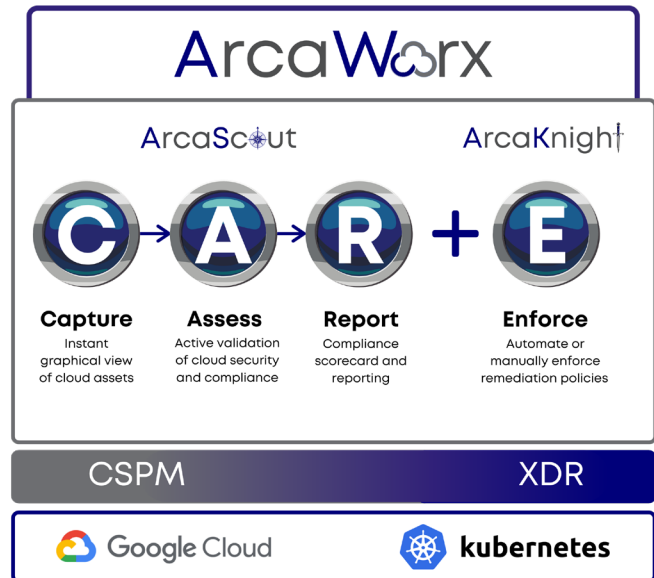

PCI DSS COMPLIANT

Automated remediation of cloud project security weaknesses

- Immediate remediation of misconfigurations
- Enforcement of desired compliance standards

CAR+E Framework

ArcaWorx is optimized for the Google Cloud Platform and Kubernetes. The ArcaWorx suite of products delivers Cloud Security Posture Management (CSPM) and Extended Detection and Response (XDR). Our suite of products include:

ArcaScout enables:

- Capture: Instant Graphical view of cloud assets
- Assess: Active validation of cloud security and compliance
- Report: Compliance scorecard and custom reporting

ArcaKnight drives

- Enforce: Automated enforcement of remediation policies

Together, ArcaScout and ArcaKnight complete the CAR+E Framework securing your digital transformation.
